YOU'RE INVITED TO JOIN

A weekly discussion on the edge of tech

Hi! I'm [Laura Dimayuga](#). I was part of the Aspire program, cohort 4.

A year ago, my partner Mauricio and I started RAI, an innovation hub for tech consulting. We're passionate about staying at the edge of technology — every week we gather ideas from podcasts, Twitter threads, and blogs, and discuss them together.

As big fans of philosophy, we always try to consider the downsides and risks of new ideas, not just the hype. As technology keeps evolving faster and faster, it's impossible to keep up with everything on your own — so we hope this might be useful to some of you.
